BSP stratification cylinder for „Wolf solar thermal systems“

Benefits of the BSP stratification cylinder from Wolf at a glance

- Space-saving steel stratification cylinder with quality certificate
- Hydraulic components, such as the freshwater module, 2 mixer circuits and solar pump assembly can be mounted on the cylinder itself or on the wall
- Stratification separators stabilise the temperature layers inside the cylinder and improve the solar yield significantly
- Highest possible solar yields, as the cylinder can be heated up to 95 °C without risk of scaling up or scalding
- Hygienic DHW heating with a powerful freshwater module
- Plug-in connections enable DHW circulation set to be retrofitted; control via time, thermostat or by opening a tap
- As option with 2 mixer circuit assemblies for high and low temperature circuits
- Single cylinder system for the lowest heat losses
- Affordable solution for central heating backup
- Removable thermal insulation for easier manoeuvring into the installation room
- 5 year warranty on the floorstanding cylinder,
2 year warranty on all electrical or moving parts

Accessories

BSP-MK 1 mixer circuit assembly for low temperature circuit

for direct mounting on the cylinder BSP / BSP-SL

Comprising:

circulation pump DN 15-50, 3-stage or self-regulating (cat. A), fitted mixer motor (230 V/210 s), 3-way mixer DN20 kVS=4.0, 2 ball valves each in the flow and return for service without draining the buffer or heating system, integral gravity brake to prevent incorrect circulation, overflow valve, bypass butterfly valve to regulate a constant return mixing, thermometer, connections with flat gaskets and design insulation shells made from EPP.

BSP-MK 2 mixer circuit assembly for high temperature circuit

for direct mounting on the cylinder BSP / BSP-SL

Comprising:

circulation pump DN 15-50, 3-stage or self-regulating (cat. A), fitted mixer motor (230 V/210 s), 3-way mixer DN20 kVS=4.0, 2 ball valves each in the flow and return for service without draining the buffer or heating system, integral gravity brake to prevent incorrect circulation, overflow valve, bypass butterfly valve to regulate a constant return mixing, thermometer, connections with flat gaskets and design insulation shells made from EPP.

BSP-MK 1 and 2 mixer circuit assemblies for low and high temperature circuits

for direct mounting on the cylinder BSP / BSP-SL

Comprising:

two circulation pumps DN 15-50, 3-stage or self-regulating (cat. A), two fitted mixer motors (230 V/210 s), two 3-way mixers DN20 kVS=4.0, 2 ball valves each in the flow and return for service without draining the buffer or heating system, integral gravity brake to prevent incorrect circulation, overflow valves, bypass butterfly valves to regulate a constant return mixing, thermometer, connections with flat gaskets and design insulation shells made from EPP.

Zirkulationsmodul BSP-ZP zur Erweiterung des Frischwassermoduls

Comprising:

DHW circulation pump, ball valve and cam; thermostatic shutdown and time switch (activation via draw-off point or integral time switch).

for combining with solar, biomass and oil/gas

BSP 800/1000 litres

Stratification cylinder for DHW heating and central heating backup with removable flexible foam insulation and **one** internal smooth tube indirect coil

BSP-SL 1000 litres

Stratification cylinder for DHW heating and central heating backup with removable flexible foam insulation and **two** internal smooth tube indirect coils

for combining with solar and heat pump

BSP-W 1000 litres

Stratification cylinder for DHW heating and central heating backup via Wolf heat pump with removable flexible foam thermal insulation and **one** internal smooth tube indirect coil

BSP-W-SL 1000 litres

Stratification cylinder for DHW heating and central heating backup via Wolf heat pump with removable flexible foam thermal insulation and **two** internal smooth tube indirect coils

BSH buffer cylinder for "Wolf solar thermal systems"

Benefits of the BSH buffer cylinder from Wolf at a glance

- Space-saving steel stratification cylinder with quality certificate
- Hygienic DHW heating according to the instantaneous water heater principle with stainless steel DHW indirect coil
- Single cylinder system for the lowest heat cool-down losses and space requirement
- Maintenance of temperature stratification inside the buffer cylinder through the use of a circulation lance (accessory)
- No DHW primary pump required
- Low scaling tendency, even up to 70 °C
- Higher solar yield through large solar indirect coils and the permanent cooling of the lower cylinder section during DHW heating
- Higher draw-off capacity available in the short-term through large water content inside the DHW indirect coil (48 – 80 litres, subject to cylinder size)
- Variable matching of the „standby section“ for DHW heating through different positions for the DHW sensor via the sensor strip
- Removable thermal insulation for easier manoeuvring into the installation room
- 5 year warranty on the floorstanding cylinder,
2 year warranty on all electrical or moving parts

BSH 500 litres

Buffer cylinder with integral corrugated stainless steel pipe for DHW heating and central heating backup, with removable thermal insulation and **one** internal smooth tube indirect coil

BSH 800 to 2000 litres

Buffer cylinder with integral corrugated stainless steel pipe for DHW heating and central heating backup, with removable thermal insulation and **two** internal smooth tube indirect coils

SPU-2-W 500 to 1500 litre buffer cylinder

SPU-2 500 to 1500 litre buffer cylinder

Benefits of the SPU-2W / SPU-2 buffer cylinders from Wolf at a glance

- Steel buffer cylinder with quality certificate with internal smooth tube indirect steel coil (type SPU-2 without indirect coil)
- Water capacity from 500 to 1500 litres
- Eight 1 1/2" connections and four 1/2" connections in the cylinder wall
- High grade flexible foam thermal insulation with 100 mm thickness for low heat loss
- Removable thermal insulation for easier manoeuvring into the installation room
- 5 year warranty on the floorstanding cylinder,
2 year warranty on all electrical or moving parts

SPU-2W

Accessories, SPU-2 2000 to 5000 litres

Solar heating station SLS

for heating a buffer cylinder externally

- Control unit „Station heating module SLM-10“
- Large plate heat exchanger
- Motorised 3-way mixer for energy-optimised stratification into the buffer cylinder
- Infinitely variable output matching with variable speed pumps
- With heat meter
- With solar taco setter to regulate the flow rate
- With bypass circuit on the solar side
- Fully wired, hydraulically piped and programmed
- Floorstanding, fully thermally insulated
- Optional integration into building management systems
- Incl. all necessary fittings and valves

SLS-25 (24 kW) up to 20 collectors

Dimensions: 1000 x 1400 x 500 mm (W x H x D)

SLS-50 (52 kW) up to 40 collectors

Dimensions: 1100 x 1500 x 500 mm (W x H x D)

Fresh water station FWS

for hygienic DHW heating with a buffer cylinder

- Control unit „Station heating module SLM-10“
- Large plate heat exchanger
- Infinitely variable output matching with variable speed pumps
- With integral DHW circulation
- Fully wired, hydraulically piped and programmed
- Floorstanding, fully thermally insulated
- Optional integration into building management systems
- Incl. all necessary fittings and valves

FWS-140 (140kW)

Constant DHW output 40 l/min ¹⁾ bzw. 58 l/min ²⁾

Dimensions: 830 x 1445 x 490mm (W x H x D)

FWS-350 (350kW)

Constant DHW output 100 l/min ¹⁾ bzw. 143 l/min ²⁾

Dimensions: 970 x 1615 x 615mm (W x H x D)

FWS-540 (540kW)

Constant DHW output 154 l/min ¹⁾ bzw. 221 l/min ²⁾

Dimensions: 1140 x 1745 x 560mm (W x H x D)

Constant DHW output at:

¹⁾ 70/25°C Buffer FL/RE - 10/60°C DHW

²⁾ 65/18°C Buffer FL/RE - 10/45°C DHW with admixture of cold water 10°C at draw-off point

SEL 500 to 1000 litre DHW primary cylinder

Benefits of the SEL DHW primary cylinder from Wolf at a glance

- Steel DHW primary cylinder with two-layer enamel coating
- Lateral DHW outlet
- Cold/hot water connections and 2 charging connections G(AG) 1 1/4" or 2" DHW circulation 1" female thread
Thermometer 1/2" female thread
2 control or test connections 1/2" female thread
- The interior of the cylinder is protected against corrosion by a two-layer enamel coating and a protective magnesium anode
- Low heat loss through high grade polyester fleece insulation 100 mm
- Removable thermal insulation for easier transport into the installation room
- 5 year warranty on the floorstanding cylinder,
2 year warranty on all electrical or moving parts

Accessories, SEL 500 to 1000 litres

LS cylinder heating station

for external heating of the SEL DHW primary cylinder

- Control unit „Station heating module SLM-10“
- Large plate heat exchanger
- Infinitely variable output matching with variable speed pumps
- With taco setter to regulate the flow rate
- With integral DHW circulation
- Fully wired, hydraulically piped and programmed
- Floorstanding, fully thermally insulated
- Optional integration into building management systems
- Incl. all necessary fittings and valves

LS-140 (138kW)

Constant DHW output 39 l/min ¹⁾ bzw. 56 l/min ²⁾,
Dimensions: 1395 x 1210 x 500mm (W x H x D)

LS-210 (209kW)

Constant DHW output 60 l/min ¹⁾ bzw. 85 l/min ²⁾
Dimensions: 1605 x 1210 x 550mm (W x H x D)

LS-315 (315kW)

Constant DHW output 90 l/min ¹⁾ bzw. 128 l/min ²⁾
Dimensions: 1605 x 1210 x 550mm (W x H x D)

Continuous DHW output at:

¹⁾ 70/45°C boiler FL/RE - 10/60°C boiler flow/return

²⁾ 70/45°C boiler FL/RE - 10/45°C boiler flow/return

Specification LS cylinder heating station

* with admixture of cold water 10°C at draw-off point

SEM-1 / SEM-2 Solar cylinder

Benefits of the SEM solar cylinder from Wolf at a glance

- Solar steel cylinder with quality certificate and two-layer enamel coating with two smooth tube internal indirect coils
- Solar pump assembly for optional fitting immediately on the SEM-2 solar cylinder
- High grade rigid PU foam thermal insulation below the foil jacket of the cylinder for low thermal losses
- The interior of the cylinder and the indirect coils are protected against corrosion by two-layer enamel coating and a protective magnesium anode
- Large heat exchanger areas ensure a short heat-up time and a high constant DHW output
- Side flange for additional indirect coils and easy maintenance
- Connection for an electric immersion heater
- Optimised ratio between diameter and height for good temperature stratification
- 5 year warranty on the floorstanding cylinder, 2 year warranty on all electrical or moving parts

Accessories

- Solar pump assembly
- Electric immersion heater 2 kW/230 V/50 Hz / 4.5 & 6 kW/400 V/50 Hz. Integral cylinder thermostat and high limit safety cut-out. Frost protection is assured. The cylinder water temperature can be adjusted either up to 60 °C or up to 80 °C.
- Primary pump 3/4" / 1"
- Thermometer
- External power anode
- Flexible pipe set

SEM-1 / SEM-2

Steel solar cylinder for DHW heating with two-layer enamel coating and 2 smooth tube internal indirect coils

SE-2 Floorstanding cylinder

Benefits of the Wolf SE-2

- Steel solar cylinder with quality certificate and two-layer enamel coating and one internal smooth tube indirect coil
- Inspection and cleaning apertures for easy maintenance
- High grade rigid PU foam thermal insulation below the foil jacket of the cylinder for low thermal losses
- The interior of the cylinder and the indirect coils are protected by a two-layer enamel coating and a protective magnesium anode (SE-2-750 with impressed current anode)
- Large indirect coil surface area for short heat-up times and a high constant DHW output
- Connection for an electric immersion heater
- Optimised ratio between diameter and height for good temperature stratification
- 5 year warranty on the floorstanding cylinder, 2 year warranty on all electrical or moving parts

Accessories

- Electric immersion heater 2 kW/230 V/50 Hz / 4.5 & 6 kW/400 V/50 Hz. Integral cylinder thermostat and high limit safety cut-out. Frost protection is assured. The cylinder water temperature can be adjusted either up to 60 °C or up to 80 °C.
- SP1 control unit for primary pumps
- Primary pump 3/4" / 1"
- Thermometer
- External power anode
- Flexible pipe set

FMS multi-cell cylinder bank

Product range

- Large water capacity on a small footprint
- Long service life through corrosion-resistant stainless steel
- Easy handling through modular construction
- Easy installation through plug-in casing
- Five year warranty

Energy saving and environmental protection included

COB oil condensing boiler: Off to the future

NEW! Now up to 40 kW for larger projects.
In proven, test-winner quality

The comprehensive equipment range from system supplier Wolf offers the ideal solution for commercial and industrial buildings, for new build and for modernisation projects alike. The range of Wolf control units fulfils every need where heating convenience is concerned. The products are easy to operate, energy-efficient and reliable. Photovoltaic and solar heating systems can be quickly integrated into existing systems. All Wolf products can be easily and rapidly commissioned and maintained.

Wolf GmbH, PO Box 1380, D-84048 Mainburg, Tel.: +49 87 51 / 74-0, Fax: +49 87 51 / 74-1600, Internet: www.wolf-heiztechnik.de
